Web viewer

https://shivasheesh-verma.github.io/namma-space-round1/

Click the picture, then walk with WASD. Shift is faster. The mouse looks. R returns to the start. The plan in the corner is the measured floor, 8.95 m by 7.43 m, with a 2 m scale. Walls and the closed door stop the walk. Furniture does not. The page downloads 83 MB before the room appears.

Demonstration video

https://shivasheesh-verma.github.io/namma-space-round1/docs/Demonstration.mp4

3 minutes 57 seconds: the scope, the capture, the check, and the walk. The link plays in the browser. The same file is docs/Demonstration.mp4 in the repository.

Repository

https://github.com/Shivasheesh-verma/namma-space-round1

Setup, the train config, and eight sample frames are in that repository. The viewer loads mushroom/scene.ply from the same site: 333,910 points, 83 MB. The full trained file, 888,760 points and 220 MB, is on the release tagged round1.

Model

MuSHRoom classroom, iPhone 12 Pro Max, November 2023, CC BY 4.0. Gaussian splat, 888,760 points in the trained file. Held-out check on 24 views: 22.9 dB, SSIM 0.739, LiDAR depth error 7.0 cm.
