Namma Space — Round 1 proof of concept

Shivasheesh Verma · shivasheeshverma@icloud.com · 1 November 2026

Web viewer

Open this first. It is the viewer running on the submission machine, reachable from anywhere: https://optical-apartment-gordon-increase.trycloudflare.com/

The same page is also at https://shivasheesh-verma.github.io/namma-space-round1/

Click the picture, then walk with WASD. Shift is faster. The mouse looks. R returns to the start. The plan in the corner is the measured floor, 8.95 m by 7.43 m, with a 2 m scale. Walls and the closed door stop the walk.

Repository

https://github.com/Shivasheesh-verma/namma-space-round1

Setup, the train config, and eight sample frames are in that repository. The viewer loads mushroom/scene.ply from the same site, so the page stays up on GitHub Pages. The full 220 MB file is also on the release tagged round1. The demonstration video is docs/Demonstration.mp4 in the repository: 3 minutes 57 seconds, covering the scope, the capture, and the walk.

Model

MuSHRoom classroom, iPhone 12 Pro Max, November 2023, CC BY 4.0. Gaussian splat, 999,454 points. Held-out views: 22.9 dB, SSIM 0.739, LiDAR depth error 7.0 cm.
