Namma Space — Round 1 proof of concept

Shivasheesh Verma, Sarvagya, and Vidhi · shivasheeshverma@icloud.com · 1 November 2026

The viewer stays online. It does not run on the team's computer, so it stays open when that computer is asleep. Open https://namma-space-viewer.vercel.app/

Web viewer

Open this link. It stays up when the team's computer is asleep: https://namma-space-viewer.vercel.app/

Click the picture, then walk with WASD. Shift is faster. The mouse looks. R returns to the start. The plan in the corner is the measured floor, 8.95 m by 7.43 m, with a 2 m scale. Walls and the closed door stop the walk. Furniture does not. The first load is about 220 MB.

Demonstration video

Demonstration.mp4 is 3 minutes 59 seconds. It plays from the file.

Repository

https://github.com/Shivasheesh-verma/namma-space-round1. Setup, the train config, and eight sample frames are in that repository, under test/sample.

Model

MuSHRoom classroom, iPhone 12 Pro Max, November 2023, CC BY 4.0. The viewer shows the exported Gaussian splat, 888,760 points. Held-out views: 22.9 dB, SSIM 0.739, LiDAR depth error 7.0 cm.
